

To Realize Life Design Developer

Management Philosophy

AEON MALL is a Life Design Developer that works with communities and produces ways of living for the future.

"Learnings Sustainable" is our initiative to contribute to and realize the local community toward the realization of a sustainable society as a corporation with the management philosophy of Life Design Developer. We are striving to create a better society with customers, local communities, partner companies, shareholders and investors.

Initiatives for material issues

Initiatives for material issues	Community with local communities	Regional and social infrastructure development	Environment	Diversity and decent work	Responsible business practices
 Our desire	 We respect local culture and contribute to their development and well-being. In addition, we aim to build social capital and trust as we face the presence of a declining population and an aging population.	 We make local residents feel comfortable as an infrastructure. We seek and provide safety and security by creating of water-resistant facilities.	 We promote environmental protection such as climate change and provide local development that is based in the community and in harmony with nature.	 We are committed to creating a participatory approach and fair wages when we work with our employees, including that of specialty shops and our employees, regardless of nationality or gender.	 We endorse the realization of a society in which customer rights are respected and we work with our suppliers in order to secure a safe and sound supply chain.
13 material issues we address	Cultural preservation and inheritance Low birth rates, aging society	Develop sustainable and resilient infrastructure Responsible consumption and production	Climate change, global warming Protecting biodiversity, resources	Healthy lives and well-being Diversity and inclusion, decent work	Human rights Bribery
