HOW WE CAME TO BE

RMKH Glove (Cambodia) Co., Ltd. (“**RMKH**“) was established in December 2021 through Resilient Medical Pte. Ltd., a joint venture company of Medtecs Group, to expand the Group’s manufacturing capabilities and product offerings and to provide the Group with an opportunity for access to the U.S.

market. RMKH is principally focused on the manufacturing and distribution of disposable medical-grade nitrile gloves, which are widely used in the healthcare industry.

RMKH's glove facility is located in Manhattan Special Economic Zone, the first and largest of its kind in Cambodia. The facility is designed to accommodate up to 10 high-speed double-former dipping lines.

In line with Medtecs Group's mission to better the world's health for everyone, everywhere, RMKH will produce high-quality medical-grade gloves to protect the health and safety of medical professionals, care workers and the general population as a whole.

RMKH will also work on integrating more clean and renewable energy to make its production process greener and more sustainable. The glove facility is in the process of getting certified to ISO 9001 and ISO 13485 standards.

TAKE A TOUR OF OUR FACILITY

As of September 2022, two lines have been put into production, with a monthly output of 50 million pieces of gloves.
