

Civil Society Support (CSS) Project

Supported by

Implemented by

Overall Goal:

To increase coordination, cooperation, and communication between civil society, the private sector, and media actors in the interest of supporting legal reform on freedom of expression, association, and assembly.

Objectives

- **1. To contribute to increased inclusive coordination and cooperation between civil society, the private sector, and media actors with an interest in impacting freedom of expression, association, and assembly**
- **2. To contribute to strengthening the ability of cluster members to collaborate for legal reform on freedom of expression, association, and assembly**

Core objectives

- This project will be to create a cluster of CSOs and non-traditional actors, and through mentoring, training, and frequent communication, collaborate on a range of activities from the grassroots to the national level
- The cluster will operate as a network of stakeholders that will meet frequently to collaborate safely and securely on common thematic goals.

Our approaches

- Increase the collective voice of workers and their independent unions and networks.
- Increase the protection and security of at-risk rightsholders and human rights activists/defenders in their pursuit of rightsholders' and human rights and social change.
- Enhance good governance in independent and solidarity
- Capacity building to enhance access to information and legal reforms
- Access to social justice.
- Networking and evidence-based advocacy.

Challenges

- Internal Factors

It is a new project for CENTRAL implementation
