## Preface

The Annual Report on Power Sector of the Kingdom of Cambodia 2017 Edition is compiled from informations for the year 2016 available with EAC and received from licensees, MME and other organizations in the power sector. The data received from some licensees may not be up to the required level of accuracy and hence the information provided in this report may be taken as indicative.

This report is for dissemination to the Royal Government, institutions, investors and public desirous to know about the situation of the power sector of the Kingdom of Cambodia during the year 2016.

With addition of more HV transmission system and MV sub-transmission system, more and more licensees are getting connected to the grid supply and expanding their area of supply. This has resulted in supply to more consumers and improvement in quality of supply. By end of 2016, 99% of the consumers are connected to the grid system. More licensees are now supplying electricity for 24 hours a day. The grid supply has reduced the cost of supply and consequently the tariff for supply to consumers. EAC has started implementation of Strategic Plan to reduce the tariff for consumers by providing subsidy to licensees through Rural Electrification Fund (REF). As a result, the tariff for LV consumers in areas supplied by National Grid has been reduced from the level of 1050-1100 Riels/kWh to 800 Riels/kWh. For poor consumers consuming up to 10 kWh/month and for Irrigation pumps operating during night hours the tariff has been reduced to the level of 480 Riels/kWh.. As reported by the licensees, the number of consumers by end of 2016 is 2,170,682; which is 16.75 % higher than the number reported in 2015. From 2014, Time of Use tariff for MV consumers of EDC connected to National Grid has been introduced on an optional basis.

Any comments or suggestions from Royal Government, institutions, investors or public to improve the Annual Report published by EAC are welcome and will be considered by EAC to publish more useful reports in future reflecting the actual situation of the sector.

EAC expects that this report will be a valuable document for the information for the year 2016 on the power sector of the Kingdom of Cambodia.

## **Basic Laws and Regulations for Management of Power Sector in the Kingdom of Cambodia**

## **CHAPTER 1**

### **Basic Laws and Regulations for Management of Power Sector in the Kingdom of Cambodia**

#### **1.1 Electricity Law of the Kingdom of Cambodia**

The Electricity Law of the Kingdom of Cambodia was adopted by National Assembly on November 06, 2000 at the plenary session No.5 of term 2, and agreed by the Senate on the form and content of the law on December 13, 2000 at the plenary session No.4 of term 1 and announced to be consistent with the Constitution by the Constitutional Council on January 15, 2001. The Law was finally promulgated by ROYAL DECREE No. NS/RKM/0201/03 dated February 02, 2001 by Preah Bath Samdech Preah Norodom Sihanouk, King of Cambodia. The Electricity Law of the Kingdom of Cambodia has been amended first in 2007 and again in 2015. The purpose of this law is to govern and to prepare a framework for the electric power supply and services throughout the Kingdom of Cambodia. This law covers all activities related to supply of electricity, provision of services and use of electricity and other associated activities of power sector.

In preparation of a framework for the electric power supply and services throughout the Kingdom of Cambodia, the Law provides for the establishment of “Electricity Authority of Cambodia” (EAC), a legal public entity, being granted the right by the Royal Government to be an autonomous agency to regulate the power sector in the Kingdom of Cambodia.

The Electricity Law provides that the Electricity Authority of Cambodia shall consist of three Members, including the Chairman. The Chairman and Members shall be designated and proposed by the Prime Minister and shall be appointed by Royal KRET. Each Member shall have a 3 (three) year term, which shall be staggered so that the term of the initial members shall expire at different times.

As per the Electricity Law of the Kingdom of Cambodia, “no person may operate as an electric power utility or provide electric power services unless he/she has performed under and in accordance with the terms of a valid license issued by EAC.

Regulations, orders and decisions issued by EAC are enforceable as per the Electricity Law. EAC is competent to file complaints in the courts of the Kingdom of Cambodia for any violation of the Electricity Law or the regulations, orders, decisions as well as licenses issued by EAC.

The Law also provides for the rights, obligations and penalty on the service providers as well as the consumers in order to establish fair condition in the business and the use of electricity.

#### **1.2 Responsibilities of Ministry of Mines and Energy and Electricity Authority of Cambodia in Power sector**

Article 3 of the Electricity Law of the Kingdom of Cambodia defines the responsibility of Ministry of Mines and Energy and Electricity Authority of Cambodia (EAC) separately. As per the provisions of this article, after EAC has started its operation, the governing of the power sector in the Kingdom of Cambodia shall be bifurcated, 1-the Ministry of Mines and Energy shall be responsible for setting and administrating the government policies, strategies and planning in the power sector and 2-the Electricity Authority of Cambodia shall ensure that the provision of services and the use of electricity shall be performed efficiently, qualitatively, sustain ably and in a transparent manner.

The Ministry of Mines and Energy, through its duty for setting and administering the government policies, strategies and planning in the power sector, is the institution of the Royal Government to chalk out the path that the power sector in the Kingdom of Cambodia is going to take. This institution is also responsible for setting the technical standards for the power sector.

EAC is responsible to issue rules, regulations and procedures and to monitor, guide, coordinate the operators in power sector, both suppliers and consumers, including requiring them to follow the policy and guidelines and technical standards issued by Ministry of Mines and Energy. EAC has to ensure that the provision of services and the use of electricity shall be performed efficiently, qualitatively, sustainably and in a transparent manner.

The roles of the two organizations in governing power sector in the Kingdom of Cambodia as provided in the Electricity Law of the Kingdom of Cambodia is shown in the following diagram:

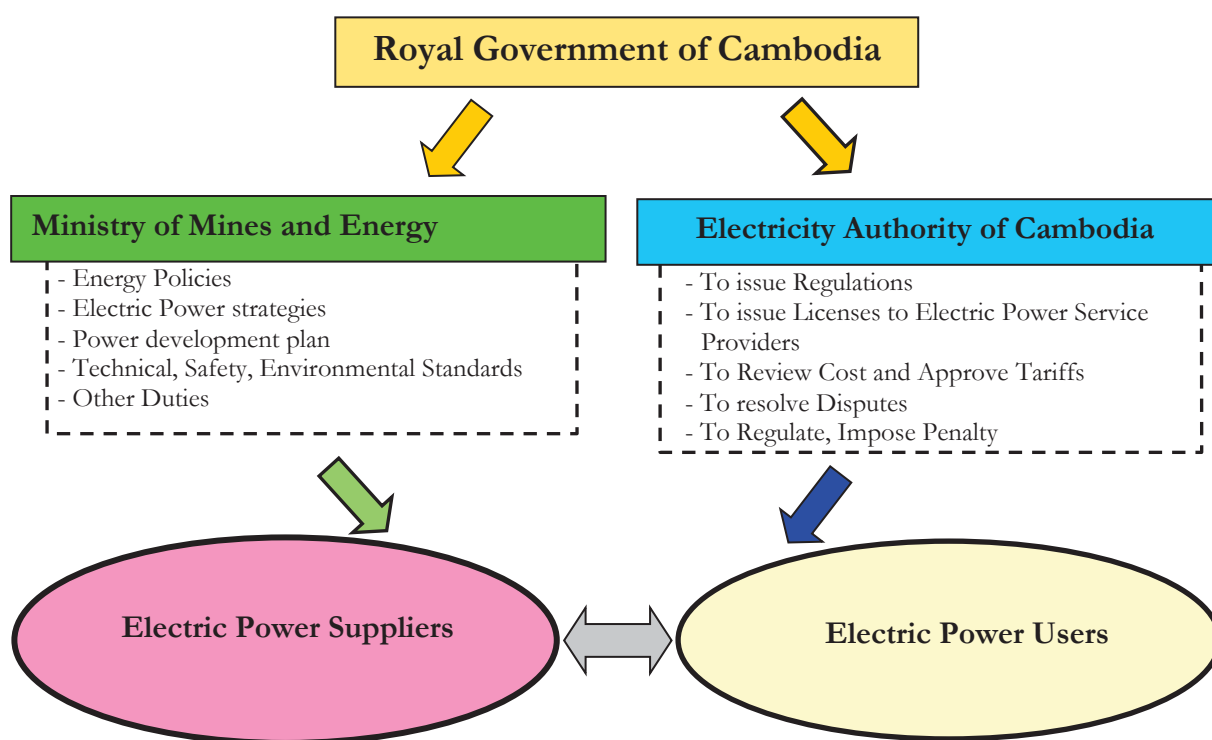

Figure 1: Separation of role between MME and EAC

### 1.3 Duties of the Electricity Authority of Cambodia in the Power sector

#### 1.3.1 Regulation of the Electric Power Services

Electricity Law of the Kingdom of Cambodia has granted the right and autonomy to EAC to regulate the activities relating to Electric Power Services in order to ensure that the services and the business of the electric power service providers are actually carried out efficiently, qualitatively, sustainably and in a transparent manner. Granting of the right to EAC to regulate these services does not mean that Law has provided for EAC to get involved in or to manage the internal business of the electric power service providers; but it allows EAC to advise, guide or direct the service provider, to modify or cease such activity which affects the service being performed efficiently, qualitatively, sustainable and in a transparent manner. The guiding action or direction to revise or cease any activity is to be carried out in public interest and to protect the interest of the consumers.

### **1.3.2 Governance of relation between Delivery, Receiving and Use of Electricity**

The relation between Delivery, Receiving and Use of Electricity means the relations between generators and transmitters, between generators and distributors, between transmitters and distributors or between suppliers and consumers. These relations relate only to the cycle of delivery, receiving and use of electricity. The relations can cover the conditions of delivery and receiving electric power services between above parties; the obligations and rights of the above parties in delivery and receiving electric power services; the cost of electric power services that one party pays to the other party; the quality of electric power services that one party provides to other parties etc.

### **1.3.3 Powers and Duties of Electricity Authority of Cambodia**

According to the Article 7 of Electricity Law of the Kingdom of Cambodia, EAC has the following powers and duties:

- (a) To issue, revise, suspend, revoke or deny the licenses for the provision of electric power services as provided in article 29 of the Law;
- (b) To approve tariff rates and charges and terms and conditions of electric power services of licensees, except where the Authority consider those rates or charges and terms and conditions are established pursuant to a competitive, market-based process;
- (c) To enforce regulations, procedures and standards for investment programs by licensees;
- (d) To review the financial activities and corporate organization structure of licensees to the extent that these activities and organization directly affect the operation of the power sector and the efficiency of electricity supply;
- (e) To approve and enforce the performance standards for licensees;
- (f) To evaluate and resolve consumer complaints and contract disputes involving licensees, to the extent that the complaints and disputes relate to the violation of the conditions of license;
- (g) To approve and enforce a uniform system of accounts for all licensees;
- (h) To prepare and publish reports of power sector and relevant information received from licensees for the benefit of the Government and the public;
- (i) To prescribe fees applicable to licensees;
- (j) To determine the procedures for informing the public about its activities within its duties, in order to ensure that the Electricity Authority of Cambodia complies with the principle of transparency as set forth in Article 3 of this law;
- (k) To issue rules and regulations and to make appropriate orders, and to issue temporary and permanent injunction for electric power services;
- (l) To impose monetary penalty, disconnect power supply, suspend or revoke the license for the violations of this Law, standards and regulations of the Electricity Authority of Cambodia;
- (m) To require the electric power service providers and the consumers to obey the rules relating to the national energy security, economic, environmental and other Government policies;
- (n) To perform any other function incidental or consequential to any of the duties as describes above; and
- (o) To establish the terms and conditions of employment of the officers or employees including experts/advisors of Electricity Authority of Cambodia.

## **CHAPTER 2**

### **Information on Electricity Authority of Cambodia – the Regulator for the Power Sector in the Kingdom of Cambodia**

#### **2.1 Regulator in Power Sector**

According to the Electricity Law, the Electricity Authority of Cambodia (EAC) shall consist of 3 (three) members. The members of EAC shall be designated and proposed by the Prime Minister and shall be appointed by the Royal KRET. The members of EAC during 2016 are as follows:

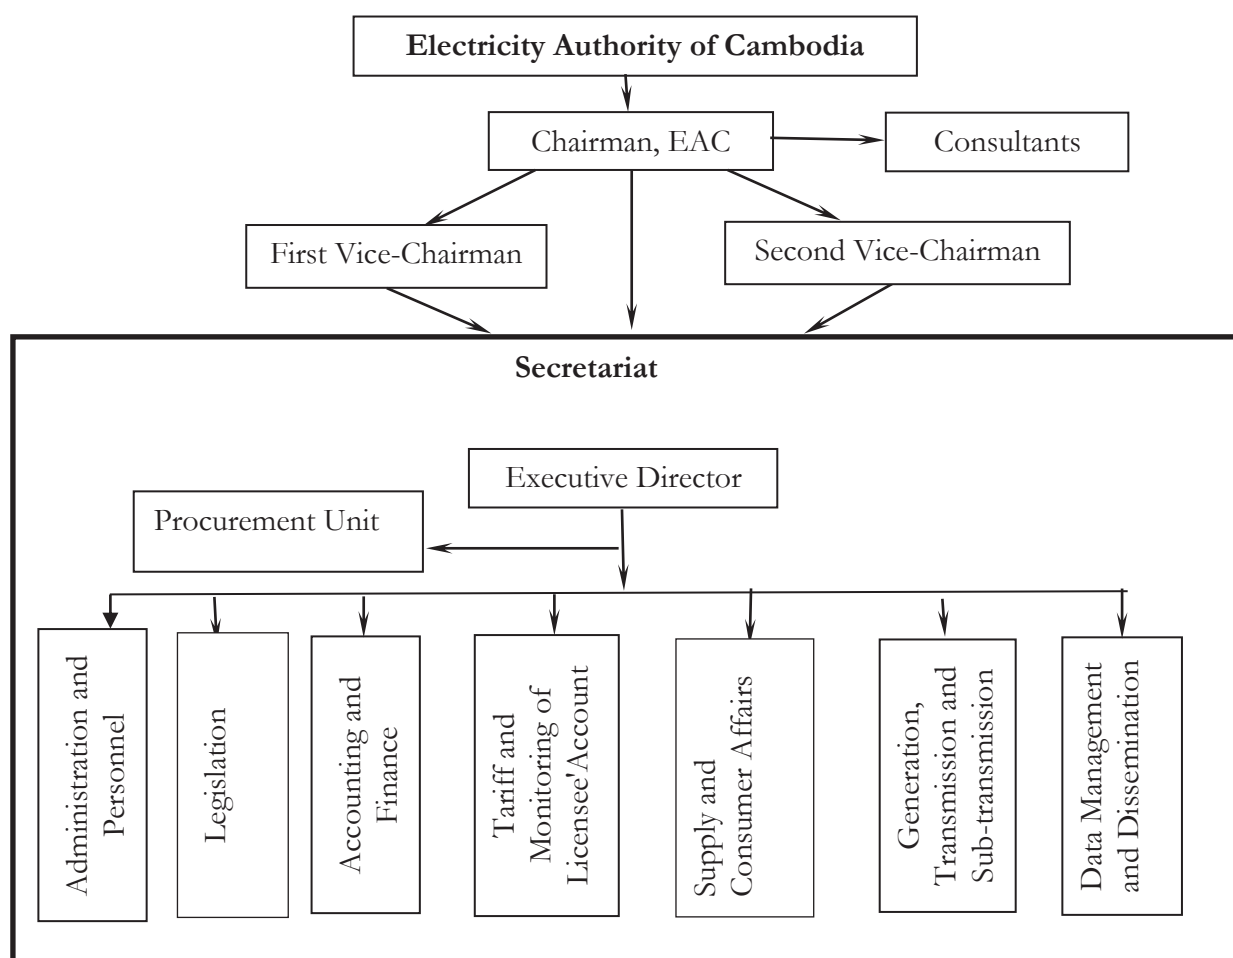

1. **H.E. Dr. Ty Norin**, Chairman
2. **H.E. Hul Kunnak Vuth**, First Vice-Chairman
3. **H.E. Sam Oeun Kim Hoeun**, Second Vice-Chairman

#### **2.2 Organization of Electricity Authority of Cambodia**

As provided by Electricity Law, EAC shall have one secretariat for assistance. This secretariat shall be headed by an Executive Director. The Executive Director shall be appointed by Chairman of EAC after consultation with other members.

The highest authorities of EAC are the three regulators i.e. the chairman of EAC and the two vice-chairmen. Under the chairman and vice-chairmen, there is one secretariat headed by the executive director. Secretariat provides support to EAC for administrative and technical works and controlling the specialized departments under it. The secretariat has seven departments and one office unit. The departments of the secretariat are 1 – Department of Administration and Personnel, which is in charge of administration and works relating to personnel in the employment of EAC; 2 – Department of Legislation, which is in charge of Legal works, resolution of disputes and imposition of fines; 3 – Department of Accounting and Finance, which is in charge of finance, License fees and accounts works; 4 – Department of Tariff and Monitoring of Licensees' Accounts, which is in charge of monitoring and approval of tariffs of licensees for sale of electricity and monitoring of the accounts of licensees to assess the cost of supply; 5 - Department of Supply and Consumer Affairs, which is in charge of works relating to supply of electricity by Distribution licensees and consumer affairs; 6 – Department of Generation, Transmission and Sub-transmission – which is incharge of works relating to generation licences and transmission licenses for both transmission and sub-transmission; 7 – Department of Data Management and Dissemination – which is incharge of works relating to consolidation of data and information collected from all departments of the secretariat and responsible for managing and disseminating the information to the public. The Procurement Office unit works directly under the Executive Director and is guided by the Procurement Committee (PC). The Procurement Office is responsible for planning and procedure for procurement and reviews costs to propose expenditure budget for purchases, supplies and services.

The organization structure of EAC is as shown in the schematic diagram given below.

**Figure 2: Organization chart of EAC**

### 2.3 The Budget of EAC and License Fees

The Electricity Authority of Cambodia is an autonomous agency working for the interest of all electric power service providers and electricity users in the Kingdom of Cambodia. Therefore the expenditure of EAC for its operation is to be borne by all electric power service providers in the form of payment of license fees. Article 27 of the Electricity Law provides that EAC shall have an autonomous budget for its operation. This budget shall come through License Fees paid by applicants and licensees as determined by EAC. For governing the license fees charged by EAC, The Electricity Law has further provisions that “The maximum license fees are to be determined by a Sub-Decree of the Royal Government”.

Under the provisions of the Electricity Law of the Kingdom of Cambodia, the Royal Government have issued sub-decree No. 131-OR-N-KR/BK dated December 27, 2001 determining the maximum license fees applicable to the electric power service providers in the Kingdom of Cambodia.

According to Electricity Law, EAC shall determine the rate of the license fees to be paid by the licensees every year based on the maximum license fees determined by the sub-decree. For the year 2016, EAC has determined the license fees to be paid by licensees vide Notification No. 006-

SR-16-EAC Dated January 29, 2016; keeping the rates same as that ifor the year 2015. The license fees determined for the years 2015 and 2016 are given in Table 3 below.

## 2.4 Financial Statements of EAC

The Electricity Law provides that the annual financial statement, together with the accounting books of the Authority and related records shall be audited by auditor and inspected by the National Audit Authority. Within 1 (one) month after auditing, the Authority shall submit all reports to the Prime Minister for approval, and shall publish the approved reports to the public. ## CHAPTER 3

### Information on Licenses and Licensees in the Kingdom of Cambodia

#### 3.1 Licenses for Providing Electric Power Services

As per the provisions of the Electricity Law, each electricity service provider is required to have a license issued by EAC and to abide by the provisions of the Electricity Law, its license, and regulations and procedures issued by EAC. A License authorizes the licensee to provide electric power services as per the provisions stated in the license (called the Conditions of License). A license has two main parts:

- a. Decision to grant the right to provide the electric power service, and
- b. Conditions of license.

Types of licenses that can be issued and regulated by EAC are stated below:

1. **The Generation License:** It grants the right to generate electric power from specified generation facilities.
2. **The Transmission License:** It grants the right to provide transmission service. There are 2 types of Transmission License: National Transmission License and Special Purpose Transmission License.
  - i. **The National Transmission License** can be issued only to state power transmission company which is under the Government control, to have the right to provide the transmission service for delivering the electric power to the distribution companies and bulk power consumers throughout the Kingdom of Cambodia
  - ii. **The Special Purpose Transmission License** grants the right to construct, own, and operate specified transmission facilities in the Kingdom of Cambodia for the specified purpose.
3. **The Distribution License:** It grants the right to provide the electricity distribution services in a determined contiguous territory.
4. **The Consolidated License:** It is a license, which may be the combination of some or all types of licenses. The Consolidated License can be issued to EDC and to the isolated systems to grant the right to generate, transmit, dispatch, distribute and sale electric power to the consumers. In issuing Consolidate License, EAC shall consider long term planning and the objectives of Government policy to reduce long run marginal cost for supply of electricity to consumers, establish a national grid and progressively expand this grid throughout Kingdom of Cambodia.
5. **The Dispatch License:** It grants the right to control, manage, and operate the dispatch facilities for facilitating delivery and receiving electricity from the generation, transmission and distribution systems.
6. **The Bulk Sale License:** It grants the right to buy electricity from any Generation Licensee or from the power systems of neighboring countries for sale to Distribution Licensees or to large customers in one connected power system.

7. **The Retail License:** It grants the right to engage in the sale of electric power to consumers in a contiguous service territory.
8. **The Subcontract License:** It grants the right to provide electric power services according to the subcontract agreement with the existing licensee.

### 3.2 Licenses issued, revoked and type changed during 2016

The number of licenses issued, revoked and valid during the year 2016 is given in the Table below.

Electricite Du Cambodge (EDC) is the only licensee in the Public Sector, all other licensees being in Private Sector.

Province wise area of supply served by Consolidated Licensees, Distribution Licensees and Retail Licensees are given in **Annex 1**. In case a licensee is connected to a grid supply, the Annexure 1 shows the name of the Grid and for licensees with isolated operation, the annexure shows the normal hours of supply for the licensee.

Maps of Provinces of Cambodia showing the location of the licensed area of supply up to end of 2016 is given separately in this report.

### **3.3 Revision of Licenses**

Licenses are revised from time to time, as required, for various reasons. During 2016, the revisions were for extension of area of supply - 20 licenses, reduction of area of supply - 7 licenses, extension of term of the license – 27 licenses, change of ownership- 25 licenses, change/addition of certificate of incorporation – 21 licenses, Change of Transmission area – 1 license and change of type of license – 82 licenses.

### **3.4 Licenses during the decade**

EAC issued the first license in February 2002. The types of license issued during the initial years were (i) Consolidate License consisting of Generation, National Transmission and Distribution License (issued to EDC), (ii) Generation License, (iii) Distribution License and (iv) Consolidate License consisting of Generation and Distribution License. The first Retail License was issued in July 2006. With the construction of 115 kV transmission line from Thai border to Banteay Meanchey, Battambang and Siem Reap in the private sector, the first Special Purpose Transmission License was issued in February 2007. With the development of subtransmission system and expansion of distribution to new areas Consolidate license consisting of Special

Purpose Transmission and Distribution License were issued, and the first such license was issued in June 2008. The number of licenses valid at the end of each year during 2007-2016 is given in the following Table:

### 3.5 Efforts of Government of Cambodia, Rural Electrification Fund and EAC to assist licensees

In 2013, the Ministry of Industry, Mines and Energy was divided into two ministries – (i) Ministry of Industry and Handicrafts and (ii) Ministry of Mines and Energy. The electricity sector is under the Ministry of Mines and Energy.

During 2012, Rural Electrification Fund (REF), which till then was working as an independent organization, was transferred to the control of EDC. During 2015, REF has carried out the following programs:

#### (i) Power to the Poor (P2P) Program

The purpose of this program is to facilitate the poor households in rural areas to have access to electricity for their houses from grid supply by providing interest free loan to meet (i)- costs for the connection fees of the licensee, (ii)- costs for deposit to be deposited with the licensee, (iii)- costs for purchase of materials and labor for the installation of wires from the connection point to its house, and (iv)- costs for purchase of materials and labor for the installation of in-house wiring. The loan is disbursed through the licensee who is responsible to pay back to REF by collecting from the Borrower in easy monthly installments within a specific period. The maximum amount of this loan is 480,000 Riels per household. During 2016; 1,065 households in 54 villages were benefited under this program. The funding for this program was provided by Kreditanstalt für Wiederaufbau (KfW)

#### (ii) Program for Providing Assistance to Develop Electricity Infrastructure in Rural Areas

The purpose of this program is to facilitate the licensee in rural areas to access fund for investing on expansion of electricity supply infrastructure to fully cover its authorized distribution area in order to allow all rural households in the licensed area have access to electricity for use. The criterion for implementation of this program is formulated for three different types of areas considering the density of population as follows:

Area No. 1 - Area with high density of population having economic efficiency: REF will provide the guarantee on loan borrowed by the licensee from banks for investment on expansion of electricity infrastructure in rural areas to fully cover its authorized distribution area.

Area No. 2 - Area with medium density of population, where doing electricity business may not be profitable if the licensee has to pay interest on the investment capital: REF will provide interest free assistance for investment on electricity infrastructure in rural areas.

Area No. 3 - Area with low density of population, where doing electricity business is not viable unless part of the infrastructure cost is provided as grant: REF will provide part of the infrastructure cost as grant and part of the cost as interest free assistance for investment on electricity infrastructure in rural areas.

During 2016, REF has executed 96 contracts with 75 licensees under EDC funding and 16 contracts with 15 licensees under KfW funding for providing assistance to develop electricity infrastructure in rural areas under program for Area No.2. The length of the network constructed in different provinces under the two fundings by licensees during 2016 is given in the following Table.

## CHAPTER 4

### Generation, Import and Transmission

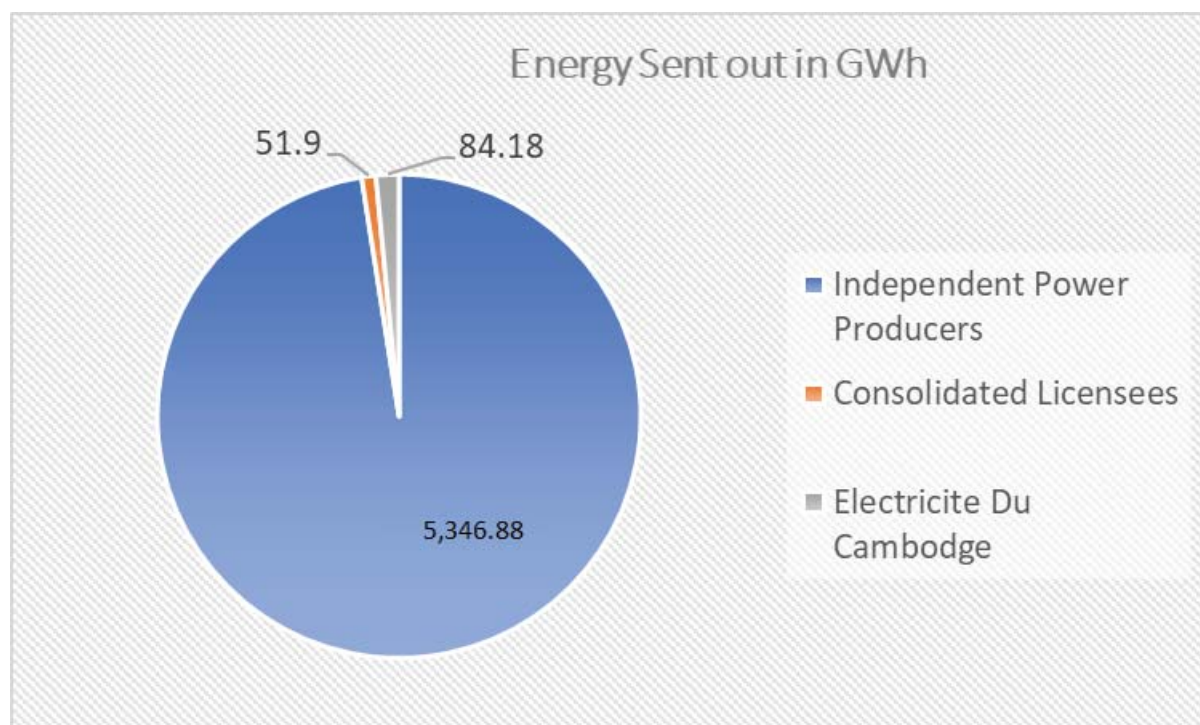

#### 4.1 Generation in Cambodia

##### 4.1.1 Generation by Type of License

Two types of licensees generate electricity in the Kingdom of Cambodia. Independent Power Producers having generation license generate and sell electricity to suppliers or industries in compliance with the Power Purchase Agreement with that supplier or industry; and Consolidated Licensees, having generation license as one of its licenses, generate electricity for supply to consumers through their distribution system.

The information on operation of generation system by Generation Licensees, Electricite du Cambodge and Isolated systems operated by Consolidated Licensees is given in **Annex 3**, **Annex 4** and **Annex 5** respectively. The summary information about installed capacity and energy sent out by the Independent Power Producers, EDC and Consolidated licensees is given in **Annex 2(b)**.

The total energy generated and sent out by licensees in Cambodia during 2016 is 5,482.96 GWh, which is 22.13 % more than the energy sent out during 2015. The quantum of energy sent out by the Independent Power Producers, Consolidated licensees and EDC is shown in the graphic given below:

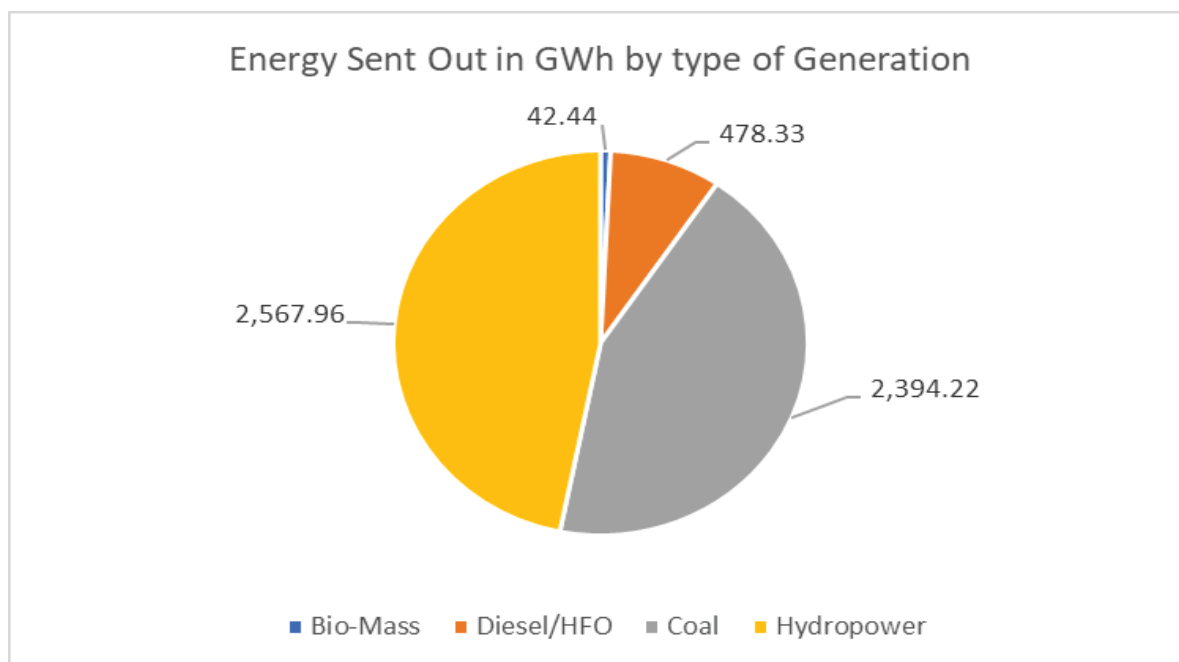

#### 4.1.2 Generation by Type of Generation Facilities

Electricity generation facilities in the Kingdom of Cambodia for the year 2016 can be divided into 4 types: 1 - Hydropower Plants, 2 - Diesel power Plants, 3- Thermal Power Plants using coal and 4 – Plants using wood and other biomass. No major power plant capacity was added during 2016. During 2016 the following Hydropower Plants were in operation – Kirirom1, Kirirom 3, Kamchay, Stung Atay, Lower Stung Russei Chrum and Stung Tatay connected to the National Grid, Ratanakiri and O Chum connected to Ratanakiri power system of EDC, and Mondulkiri connected to Mondulkiri power system of EDC. SL Garment Processing (Cambodia) Ltd, supplying part of its generation to EDC Phnom Penh, Angkor Bio Cogen Co., Ltd, Phnom Penh Sugar Co., Ltd, IED Invest (Cambodia) and Cam Chilbo Electric Power Co., Ltd use wood, agricultural products or waste as fuel for generation of electricity. Sovanna Phum Investment Co., Ltd, connected to the Phnom Penh System, Cambodia Energy Limited, and C.I.I.D.G.Erdos Hongjun Electric Power Co., Ltd connected to National Grid, use coal to generate electricity. All other power plants of the licensees are diesel power plants using Heavy Fuel Oil (HFO) and/or Light Diesel Oil (LDO). The summary information on installed capacity and energy sent out by type of generation is given in **Annex 2(c)**. Total electricity generation in Cambodia during 2016, 5,482.96 GWh compared to 4,489.27 GWh in 2015. The electricity generated in Cambodia during 2016 is more by 22.13%, compared to electricity generation in 2015.

The quantum of energy sent-out by the Independent Power Producers, and Consolidated licensees classified by generation type is shown in the graphic given below.

#### 4.1.3 Generation Projects under implementation and planning

Following Generation Projects are under construction and their position at the end of 2016 is stated below:

- i. 135 MW Coal Fired Power Plant in Sihanoukville: The Project consists of 1 x 135 MW coal fired electric power generating facility at Sihanoukville. The project is being implemented by C.I.I.D.G.Erdos Hongjun Electric Power Co., Ltd. PPA has been signed with EDC. The project is scheduled to be commissioned in 2017.

- ii. Se San Hydroelectric Project: PPA has been signed between EDC and Hydro Power Lower Sesan 2 Co., Ltd on 26 November 2012. The plant is proposed to have 8 units of 50 MW each. The project is expected to be commissioned in 2017.
- iii. A 135 MW (Net) coal fired project in Sihanoukville is being implemented by Cambodia Energy 2 Co., Limited. EDC is negotiating the PPA.
- iv. A 10 MW Solar Farm at Bavet in Svay Rieng Province is being implemented by Sunseap Asset (Cambodia) Co., td. The PPA has been signed between the company and EDC. The solar plant is expected to be commissioned in 2017.
- v. Prek Laang Hydroelectric Project: Pre-feasibility study has been done. The proposed capacity of the plant is 90 MW.
- vi. A 8 MW Biomass project in Kohkong Province is being implemented by Kohkong Sugar Industry Limited. The company has signed PPA with EDC.
- vii. EDC has signed a PPA with Rui Feng (Cambodia) International Company Limited to purchase 2-4 MW power from the company's power plant in Preah Vihear Province.

## 4.2 Energy Imported from Neighboring Countries

Cambodia imports electricity from Thailand, Vietnam and Laos. The import from Vietnam is at 22 kV through a number of connections and at 230 kV through Vietnam – Takeo - Phnom Penh 230 kV line. Similarly import from Thailand is at 22 kV through a number of connections and at 115 kV through Thailand - Banteay Meanchey - Battambang and Siem Reap line. The import from Laos is at 22 kV to Steung Treng. The voltage is raised to 35 kV and supplied to Preah Vihear area through a 115 kV line charged at 35 kV.

Based on the Electricity Trade Agreement between Ministry of Mines and Energy of Cambodia with the Ministry of Industry of Vietnam, EDC has signed Power Purchase Agreements with Vietnam Power No.2 for import of electricity at a number of points for supply of electricity to areas located near the Cambodia – Vietnam border either by themselves or through other licensees.

Some private companies have received the right from MME to purchase electricity from Provincial Electricity Authority of Thailand for supply to areas near Cambodia – Thai border. Cost of electricity imported from Thailand at 22 kV is based on two-part time of use tariff of Provincial Electricity Authority of Thailand applicable for the category of consumer. The tariff has demand charges (Baht per kilowatt of maximum demand), energy charges (Baht per kWh with different rates for energy drawn during peak and off-peak hours), service charges (fixed charge as Baht per month), power factor penalty (Baht per excess KVAR) and Ft (change in expenses charge in Baht/kWh). Because of such tariff structure, the cost of electricity varies in different months due to different use conditions. The tariff for import by EDC at 115 kV from Thailand consists of energy charge as Baht per kWh and Ft (change in expenses charge in Baht/kWh). EDC imports electricity from Laos at 22 kV for supply to Steung Treng and Preah Vihear area. The supply to Preah Vihear area is through a 115 kV line charged at 35 kV

Total import from neighboring countries are given in Annex 2A and the details are given in Annexure 5 A.

is stated below:

- i. 230 kV transmission line from Kampong Cham to Kratie with substations at Kampong Cham and Kratie. The transmission line project is being implemented by Diamond Power Ltd and is likely to be commissioned in 2017.
- ii. 230 kV transmission line from Kratie to Steung Treng with substation at Steung Treng. The transmission line project is being implemented by EDC and is likely to be commissioned in 2018.
- iii. 115 kV transmission line from GS 7 (SPP) to GS Prey Veng to GS Bavet. The transmission line project is being implemented by EDC and is likely to be commissioned in 2017.
- iv. 115 kV transmission line from Laos border to Chhaeb in Preah Vihear Province is being implemented by EDC.
- v. 230 kV transmission line from Steung Hav substation to Phnom Penh. The transmission line is being redesigned to raise the voltage to 500 kV. The transmission line project is being implemented by Alex Corporation Co., Ltd.17.

### **4.4 Operation of the High Voltage Grid System**

The High Voltage Grid System, comprising of all high voltage lines and connected grid substations, is termed as "National Grid". Apart from generation plant in Cambodia, the National Grid gets electricity supply from Vietnam at 230 kV and from Thailand at 115 kV. As it is not possible to run the supply from Vietnam in parallel with Supply from Thailand, the two systems are not operated in parallel, but many areas receive supply from either source at different times. With increased generation from Hydropower stations, the availability of supply improves in rainy season and supply from Phnom Penh area is extended upto Siemreap substation for some time during rainy season. Similarly during dry season supply from Thailand is extended up to part of Phnom Penh system. The supply from National Grid covers areas in the provinces of Takeo, Kampot, Sihanouk Ville, Phnom Penh, Kandal, Kampong Speu, Kampong Chhnang, Pursat, Battambang, Banteay Meanchey, Siem Reap, Kampong Cham, Kampong Thom, Prey Veng, Koh Kong, Tbong Khmum, Kep and Pailin.

### Report on Sub-Transmission and Supply of Electricity

#### 5.1 Development of Medium Voltage Lines

On development of the high voltage grid system in Cambodia, medium voltage lines have been constructed from the grid substations to supply power to licensees and consumers in areas around the Grid Substations. Medium voltage lines have also been extended from many locations near borders of Vietnam, Thailand and Laos, where power is being imported by licensees at MV. In the last few years EDC and other licensees have played a major role in developing medium voltage lines for both purposes of sub-transmission and distribution. The Transmission Licensee and Special Purpose Transmission Licensees operating medium voltage lines are listed in the following Table:

**Table 11: Transmission Licensees operating Medium Voltage Lines**

License No.	Name of Licensee	MV lines operated in Provinces

The length of MV lines operated by different licensees at the end of 2016 is given in Annexe 5.

EDC, with loans arranged from different sources is constructing new MV lines to extend the grid supply to more areas. Other licensees are also constructing new MV lines to avail grid supply, extend their area of supply or to improve the power supply in their area of operation.

## 5.2 Grid Supply Systems

Apart from the supply from the grid-substations of the National Grid, MV supply is made available at a number of areas along the border with Vietnam, Thailand and Laos by extension of 22 kV lines from Vietnam Grid, Thai Grid and Laos Grid. This has resulted in the development of four grid systems in Cambodia as described below;

1. National Grid: The MV lines connected to the National Grid provide electric power supply in areas around the Grid substations. Such supply is available in Phnom Penh and the provinces of Kandal, Kampong Speu, Takeo, Kampot, Kep, Sihanoukville, Koh Kong, Kampong Cham, Tbong Khmum, Kampong Thom, Prey Veng, Kratie, Pailin, Banteay Meanchey, Battambang, Siem Reap, Oddor Meanchey, Preah Vihear, Pursat and Kampong Chhnang.
2. MV Grid connected to Vietnam system: Cambodia imports electricity from Vietnam through 22 kV connections at 18 locations in the provinces of Kampong Cham, Svay Rieng, Kampot, Monduliri, Kandal, Takeo, Kratie, Prey Veng and Ratanakiri. The supply is then extended to other licensees.
3. MV Grid connected to Thailand system: Cambodia imports electricity from Thailand through 22 kV connections at 8 locations in the provinces of Battambang, Pailin, Banteay Meanchey, Koh Kong and Oddor Meanchey. The supply is then extended to other licensees.
4. MV Grid connected to Lao system: EDC imports power from Laos to supply to Steung Treng and Preah Vihear areas.

With the expansion of the four grid systems, many areas can get supply from more than one system. In fact, during 2016, many areas have got supply from more than one system during different periods of the year.

The licensees connected to National Grid and/or MV supply from neighboring country during 2016 are given in annexe 5 A.

Two Generation Licensees (i) Kampot Power Plant Co., Ltd and (ii) Angkor Bio Cogen Co., Ltd supply to captive industries Kampot Cement Co., Ltd and Angkor Kasekam Roongroeng Co., Ltd respectively.

## 5.3 Isolated Supply Systems

The rest of supply systems in Cambodia are isolated systems each consisting of its own generation and supplying a small area generally belonging to one licensee. The information on number of consumers, energy available and supplied to consumers for these isolated systems is given in Annex 5B. The provincewise consolidated data for the isolated systems is given in the following Table.

## **Chapter 6**

# **Electricity Tariff of Licensees**

## **CHAPTER 6**

### **Electricity Tariff of Licensees**

#### **6.1 Electricity Tariff**

The cost of electricity either from own generation or from purchase from IPP, neighboring country or other licensees is the single largest component of the cost of electric supply by licensees to the consumers. Hence the tariff of a licensee for supply to consumers is dependent on the cost of electricity generated or purchased. With the development of grid system, the tariff of licensees purchasing electricity from the grid has become stable. The tariff for consumers is determined based on the cost of electricity purchased and the cost of distribution. The tariff is changed when the cost of purchase of electricity or cost of distribution changes. For the licensees generating electricity using Diesel/HFO, the cost of electric supply is related to the cost of Diesel/HFO. In order to quickly reflect the change in the cost of fuel in the tariff for consumers in a simple and transparent manner, EAC implements Fuel Cost Adjustment (FCA) mechanism stated in a table. Under this mechanism, the tariff for different slab rates of fuel (diesel/HFO) is determined after public consultation, so that for only a change in the cost of fuel, the corresponding tariff is fixed by EAC without the need of further public consultation.

#### **6.2 Implementation of strategic plan to reduce electricity tariff for areas receiving electricity from National Grid**

During 2016, EAC started implementation of strategic Plan to reduce electricity tariff for areas receiving electricity tariff for areas receiving electricity from National Grid. The tariff for sale of electricity by EDC and Sub-Transmission Licensees to other licensees of the National Grid was made same. Similarly the tariff for sale to MV consumers from the National grid by EDC (except for Phnom Penh area) and other licensees was made the same. The tariff of EDC for areas getting supply from National Grid for some category of consumers was reduced.

The tariff of 1050-1100 Riels/kWh for LV consumers of other licensees receiving electricity from National Grid was reduced and made same. The tariff for LV consumers with consumption of less than 10 kWh/month and for water pump for irrigation during night time was reduced to a still lower level. To implement the strategy, EAC approved two tariffs (i) tariff based on cost of supply and (ii) tariff applicable to consumers. If the tariff applicable to consumers was lower than the tariff based on cost of supply, the licensee provided the required information to Rural Electrification Fund (REF) of EDC and the REF paid the difference by transferring the amount to the account of the licensee.

The tariff applicable to consumers approved by EAC during 2016 is given in the following paragraphs.
